

Offshore Third-party Access & Infrastructure Sharing

Optimize Development Costs and Gas Infrastructure Utilization to Liberalize the Gas Market through TPA

25th – 26th June 2020

Kuala Lumpur, Malaysia

Major Benefits of Attending

By end of this course, delegates will be able to:

- **GET TO KNOW** offshore/upstream third party access and infrastructure sharing
- **MASTER** the bidding and negotiation skill
- **EXPLAIN** key features of arrangement
- **IDENTIFY** the commercial issues associated with transportation and processing agreements, and associated tie-in agreements
- **LEARN** European legislation and codes applying to third-party access
- **UNDERTSAND** the different country regulations
- **DISCOVER** the legal terms and guidance on setting tariff levels

Why you Should Attend?

For many years negotiated contracts for access between asset-owner and potential asset-user have formed the basis for determining all the terms relating to third-party use of the infrastructure. It is possible to argue that, in circumstances where both the asset owner and the potential user can benefit from third party use of the infrastructure, market forces will produce tariffs and other terms which result in an economically efficient solution to the problem and state intervention is not required.

It is clear that asset owners can readily take advantage of the bargaining power which ownership of infrastructure provides. Such bargaining power will be a function of the extent to which alternative processing and transportation facilities are available and the costs of accessing these by the potential user.

TPA will enhance gas supply industry competitiveness as well as optimize development costs and gas infrastructure utilization to liberalize the gas market. Market liberalization will not only facilitate entry of new industry players but also encourage energy efficiency and benefit consumers through competitive gas pricing.

This course is designed for professionals that are involved in Offshore Third Party Access and Infrastructure Sharing also to whom that would like more details about the TPA in oil and gas industry. This is an intensive course provides understanding of legal framework of TPA. Through this course, participants will have the opportunity to understand the importance and Function of the TPA.
