

Hot Tapping and Plugging In Petroleum Industries

Make your connection without interruptions, the safest way!!!

26th - 28th October 2021

E -Learning Course

Major Benefits of Attending

By end of this course, delegates will be able to:

- **OUTLINE** the economic and environmental benefits of plant and pipelines hot tapping and plugging
- **ENHANCE** experience for proper selection of hot tapping and plugging tools for specific applications
- **ACT** properly during hazardous situations
- **DESCRIBE** the procedure of hot tapping and plugging
- **PROVIDE** better specification for the new and replacement of old elements of oil and gas piping system
- **IMPROVE** operational integrity and performance of hot tapping and plugging equipment
- **MINIMIZE** hot tapping and plugging failures as a result of enhanced and additional abilities
- **REFLECT** positively on organization reputation and standing in the industry
- **APPLY** the safety precautions in conducting the hot tapping and plugging processing
- **APPLY** HSE (Health, Safety & Environment) instructions when conducting plant and pipelines hot tapping and plugging operations, resulting in better safety record keeping

Course Methodology

This 3-day e-Learning Course will be conducted via ZOOM - Webinar / Video Conferencing. Delegates are required to have a working Webcam and Headset with Microphone. For a smooth conferencing, delegates should have an Internet Speed of at least 8Mbps Download and 1.5Mbps Upload Speed.

With emphasis to operate the production plants to maximize the production, hot-tapping has become one of the most popular method over other traditional branch-making methods.

Our instructor focuses on the practical aspects of the topic in hand, not on secondary subjects.

Why you Should Attend?

With emphasis to operate the production plants to maximize the production, hot-tapping has become one of the most popular method over other traditional branch-making methods. This interactive, application driven Hot Tapping and Plugging in Petroleum Industries training course will highlight the added value that Hot Tapping and Plugging practices advised by API Standards can offer to support engineers and technicians working in pipelines installation and maintenance. It will show how to safely use the equipment and apply the modern techniques in successful hot tapping and plugging a pipe line.

Who Should Attend?

This course has been specifically designed for:

- ✓ Plant Operation and Maintenance Engineers
- ✓ Pipeline Installations and Maintenance Engineers
- ✓ Technicians involved in Plant and Pipelines Construction, Operation, Maintenance and Inspection
- ✓ Plant and Pipeline Welding Technicians and Engineers
- ✓ Health, Safety & Environment (HSE) Engineers and Professionals
