

Digital Fraud: Prevention, Detection and Investigation

Gain an in depth understanding of the best practices of prevention measures, detection, and investigation techniques for digital forensic investigations.

15th - 16th November 2021

E - Learning Course

Major Benefits of Attending

By end of the course, delegates will be able to:-

- **Define** the concepts of digital forensics
- **Comprehend** the criticality of digital information and the weak points in protecting it
- **Detect** fraud early using covert measures where necessary
- **Grasp** the concept that computers are not the risk, but people are
- **Accept** that training and awareness are critical in data protection
- **Ascertain** how to tell a fraud has occurred when data cannot be seen
- **Learn** the FIVE MAIN PRINCIPLES OF DIGITAL FORENSICS
- **Discover** what is the outcome, dismissal, prosecution, intelligence gathering
- **Understand** that a digital device is a crime scene and need to be treated as such
- **Gain** Insights from a highly respected and renowned instructor who has conducted over 1000 investigations

Course Methodology

This 2-day e-Learning Course will be conducted via ZOOM - Webinar / Video Conferencing. Delegates are required to have a working Webcam and Headset with Microphone. For a smooth conferencing, delegates should have an Internet Speed of at least 8Mbps Download and 1.5Mbps Upload Speed.

Exclusive !

Trainer will share actual real life investigations of data breaches – from detection to how they can be prevented and finally leading to successful investigations

Why you Should Attend?

It is essential in business that you know if the data within your organization has been compromised, in some circumstances lack of control of that data maybe a criminal offence. It is essential that you understand the risks to data and what are those risks, internal and external.

Detecting a data breach should be something someone in charge of data within an organization, should be aware of. Unknown data breaches can go undetected for years until it is too late. Learning how to detect breaches may save your organization from suffering significant financial losses.

Do not miss the opportunity to learn from the leading expert in this field and let him answer all your questions on digital forensics.

Who Should Attend?

VPs, Directors, GMs, CFOs, COOs, Heads, Senior Managers and professionals in the following departments:

- Audit
- Fraud
- Finance
- Compliance
- Risk Management
- IT security
- Legal
- And any personnel responsible for digital forensics
