- **Explain** what constitutes a well-managed project
- **Understand** the concepts of controls and governance in a project setting
- **Understand** project risk management
- **Identify** project risks as well as common problems experienced in projects and find out their typical solutions
- **Develop** a consistent process for assessing project risk, especially with regards to contracts and procurement
- **Determine** whether a project demonstrates good project management practices
- **Learn** what to look out for when monitoring and evaluating projects
- **Enhance** efficiency through identifying your strengths and weaknesses in auditing projects
- **Plan** how to improve your skills in project auditing and risk assurance further
- **Perform** qualitative and quantitative project risk analysis
- **Master** a new way of thinking!

Course Methodology

This 2-day e-Learning Course will be conducted via ZOOM - Webinar / Video Conferencing. Delegates are required to have a working Webcam and Headset with Microphone. For a smooth conferencing, delegates should have an Internet Speed of at least 8Mbps Download and 1.5Mbps Upload Speed.

Why you Should Attend?

In this training course, you will gain the skills to identify, measure, and analyze risks in projects of all sizes and scopes. Learn to ensure the success of your projects from beginning to end by quantifying and creating a project risk management plan.

Understanding risk management in project management is a key skill required of all project managers. Attend this course and learn to leverage a proven qualitative risk-analysis process to guide your risk management decisions, and determine risk mitigations and time and cost contingencies.

This course will teach you the process of project management planning from A to Z, so you can identify different challenges and opportunities these future landscapes, or scenarios, might represent for your business.

Who Should Attend?

This workshop will be vitally important for anyone with responsibility for the future success of an enterprise of any kind, from large corporations or small family-run businesses to non-profit organizations, government bodies and NGOs, or educational institutions. People in the following functional areas of responsibility should attend:

- Project Managers
- Auditors / Internal Auditors
- Project Risk Managers
- Audit Managers
- Risk Management Managers
- Managers of Compliance
- Finance Directors and Managers
- Heads of Project Financing/Financial Controllers
- Procurement & Contract Managers
- Engineering Managers
- Technical Services
- Heads of Risk Assessment and Internal Control
- Operational Risk Managers
- Quality Assurance Managers
