

Reliability Centered Maintenance (RCM)

22nd - 24th August 2022

Kuala Lumpur (In Person) / Online Training

Major Benefits of Attending

Upon successful completion of this course, the delegates will be able to:

- **Understand** the main maintenance strategies and how RCM is integrating them
- **Explore** the components that comprise an effective maintenance program
- **Understand** the importance of RCM in the business of maintenance and its role in determining the optimum maintenance program
- **Understand** the history and principles of RCM along with the various approaches
- **Describe** the methodology for applying RCM using examples
- **Understand** what is needed to implement RCM and its results
- **Understand** the role of condition monitoring and CMMS systems in implementation of RCM
- **Understand** and utilize KPIs to measure effectiveness of RCM and maintenance performance

Course Methodology

Client has the option to choose to participate either below method.

Online Training : *This course will be conducted via Zoom.*

Marriot Group Hotel: *This course will be conducted at the hotel with the trainer on site. Participants will need to bring their own laptop. Lunch/Dinner and 2 networking breaks will also be provided.*

Training Methodology

The program will be highly interactive, with opportunities to advance opinions and ideas. Participation is encouraged in a supportive environment. To ensure the concepts introduced during the program are understood, they will be reinforced through a mix of learning methods, including lecture style presentation, open discussion, case studies, exercises, videos, and group work.

Who Should Attend?

- This course is intended for personnel involved with maintenance of assets including:
 - o Maintenance Professionals (Engineers, Planners, Supervisors, Section Leaders, Team Leaders, and Managers)
 - o Reliability Professionals (Engineers, Section Leaders, Team Leaders, and Managers)
 - o Personnel who are preparing to implement RCM and those who are considering its use.
 - o Operations and design staff who interact with maintenance.

Participants will receive a thorough overview of all the basic components of RCM
