

MetaData Management

Implement Data Management Policies and Data Governance Strategies for Your Organization

7th – 8th September 2022

Kuala Lumpur (In Person) / Online Training

Major Benefits of Attending

By attending this executive training, you will benefit from the following:

- **DEFINE** Metadata & why the old definition hides the full story
- **RECOGNIZE** the importance and relevance of metadata and discuss various uses and methods for exploiting and storing metadata
- **DISTINGUISH** the different types of metadata, content standards, and controlled vocabularies and their fit for purpose
- **DESCRIBE** content using a metadata schema, content standard, and controlled vocabulary of their choice
- **UNDERSTAND** the key industry standards for Metadata and understand how (and why) to exchange metadata between different components of your architecture
- **DISCOVER** the difference between a Business Glossary, Data Dictionary and Meta data repository and the other "library" uses of Metadata

Course Methodology

Client has the option to choose to participate either below method.

Online Course : This course will be conducted via Zoom.

Marriot Group Hotel: This course will be conducted at the hotel with the trainer on site. Participants will need to bring their own laptop. Lunch/Dinner and 2 networking breaks will also be provided.

Why You Should Attend

MetaData is often seen as an abstract concept. For many years enterprises have been organizing and accumulating business intelligence and content about their operations, customers, competitors and suppliers. While we have been hearing a lot about the inability to get to that data, drill down into business intelligence systems and organize key enterprise data, we have also been hearing about tools that make it more accessible. Metadata is often what is discussed when speaking about access to data and content.

MetaData drives action by adding context and relevance to determine importance and classification. This course sets the stage with a comprehensive discussion of the meaning, significance, and many components of Metadata Management, including business vs. technical metadata, data lineage, impact analysis, relationships, and more. agile methods of development.

Who Should Attend?

- People who want to put the ideas and concepts of metadata into effective use in their enterprise
- All roles involving work with data on a daily basis from a Developer to the CDO or a CIO
- Anyone with data management roles and responsibilities
- Data stewards and data governance practitioners and participants
- Data curators and data catalog administrators
- Data and database analysts and designers
- Data quality professionals and practitioners
- Anyone with a role in information management who needs to understand data or help others to understand data
