It is assumed that the learner is aware of the related technologies and has at least 3 years of relevant work experience to be able to comprehend and absorb the concepts to learn.

## Why you should attend

This course is the doorway to the broad horizon of the Cloud compute security technology, from a vendor independent perspective that is key to adopt the right Cloud Provider. Cloud is the new normal, while security is the key primary need for any Organization of today. Today by default, Information Technology Services are delivered mostly using Cloud. Security the Cloud Infrastructure and the relevant asset in Cloud is a CSF for any Organization. Organization today are either embarking upon a journey into Cloud or are already in the run.

The key challenges encountered are:

- Identify the Cloud Service Provider,
- Conduct the due diligence,
- Identify the context and the requirement,
- Ascertain the risk assessment and governance,
- Plan for the compliance and the audit,
- Draw up the agreements and contracting,
- Implement the operation and support, and
- Continuous improvement practices.

This course is designed to address the above challenges that influences the success factor.
