Course Methodology

Client has the option to choose to participate either below method.

Online Course : *This course will be conducted via Zoom.*

Marriot Group Hotel: *This course will be conducted at the hotel with the trainer on site. Participants will need to bring their own laptop. Lunch/Dinner and 2 networking breaks will also be provided.*

Why Should Attend?

As data becomes more and more of a critical component to the effective operation and performance of organisations in an increasingly competitive landscape, effective and efficient data management has become crucial.

This two-day course provides an overview of the disciplines of governing data, and covers the initial steps necessary to establish best practice data governance in your organisation. Suitable for every level from CDO to executive to data steward, this highly practical course will equip you with the tools and strategies needed to successfully create and implement a data governance strategy and roadmap. The course also examines changes in data governance needed to adapt to big data, self-serve analytics and agile methods of development. You will leave this course with an understanding of how to implement both data management policies and data governance strategies for your organization.

Who Should Attend?

- Executives, Managers and Analysts impacted by data analytics or other stakeholders part of the data ecosystem.
- Leaders who want to learn more about data and information governance.
- Data Stewards
- Data Managers
- Data Analysts
- Business Analysts
- IT Professionals looking into data management benefits and approaches.
- IT systems Managers
