Course Methodology

Client has the option to choose to participate either below method.

Online Training : *This course will be conducted via Zoom.*

Marriot Group Hotel: *This course will be conducted at the hotel with the trainer on site. Participants will need to bring their own laptop. Lunch/Dinner and 2 networking breaks will also be provided.*

Why you Should Attend?

Our world is full of uncertainties which makes project management a very challenging endeavor. It cannot be denied that all projects carry some degree of risk. These risks can impact the project adversely if they are not managed properly. To increase the chance of project success, project personnel must therefore take a proactive stance to develop and implement practical risk management strategies throughout the project life cycle.

This 2-day interactive course is designed to lay a solid foundation in key competencies of Risk Management. Participants will learn about the ISO 31000 2018 Risk Management Process, PMI Practical Standard for Project Risk Management, develop a practical risk management plan, and apply various tools and techniques to identify, analyze, respond, monitor, and control project risks that are detrimental to their projects. Ultimately, you will create effective risk mitigation strategies and action plans to deliver projects that meet the expectations of your stakeholders.

Who Should Attend?

This course is valuable for Project Executives/Managers/Directors, Engineers, IT Executives/Managers, Users, Business Managers, Consultants, Architects, Quantity Surveyors, Project owners, Contractors, and anyone who has a stake in seeing a project through to its successful completion in any industry or environment. Some project management experience is recommended.

Participants should bring along calculators for practical exercises.
