Why you Should Attend?

The course on Supply Chain Management and Warehouse provides a comprehensive understanding of the principles, concepts, and best practices involved in managing an efficient and effective supply chain and warehouse operations.

Students will learn about the various components of the supply chain, including procurement, logistics, inventory management, and distribution. The course also focuses on warehouse management, covering topics such as layout design, inventory control, and operational processes.

Through case studies and practical exercises, students will develop the skills necessary to optimize supply chain operations and enhance warehouse performance.

Who Should Attend?

Managers, Executives, Officers and Supervisors who deal with a whole spectrum of business and organization, process, sales, purchasing, manufacturing, warehousing, logistics, etc.

This course is designed for entry level employees in supply chain management. It is also helpful for executives who are new to supply chains or a specific domain, people re-entering the job market and experienced employees looking to work with commercial opportunities.
